

we love K-LOVE. I have 2 children, and it is good to know that we can turn on the radio and hear music with good morals and a positive message. Many churches and businesses around town listen to this station, 88.7, and all agree that it is anything but harmful to people's minds unlike others where you can hear references about sex and drugs. The public needs this station because what are our children going to listen to if it is removed. Music does affect them in a tremendous way. I just want them to grow up with the best, just like everyone does, and K-LOVE is the best!! Please don't take it away from them.
